	<ul style="list-style-type: none"> • Policy paper to advising governmental institutions on possible Climate Change Policies to be put into practice. • Education on Climate Change • Information on climate change
<p>Project results</p>	<ol style="list-style-type: none"> 1. The establishment of NET-CLIMATE network composed of 5-6 ECSOs and raise of the technical capacities of 15 civil society members on Climate challenges and solutions 2. Strengthen the network capacities and engagement by identifying and promoting 20-25 adaptation solutions to Climate at a local level, which are economically viable and can serve as solution models to be further replicated in the country. 3. Mobilize and upscale the network skills to advocate and contribute to Climate issues through direct involvement in policy development and action at local and national level. 4. Community engagement into Climate issues through information, education and concrete actions to promote eco-lifestyle with no impact to Climate Change.
