IMPLEMENTING ORGANISATIONS, PARTNERS AND COLLABORATORS

"TWIST - Towards a New Model of Social Entrepreneurship in Confiscated Assets in Albania", project is financed by the European Union and implemented by LIBERA-Associazioni, nomi e numeri contro le mafie, Partners Albania for Change and Development, and the Municipality of Tirana in cooperation with the Agency for the Administration of Seized and Confiscated Assets.

LIBERA: Associations, names and numbers against mafia

LIBERA is a network of associations, social cooperatives, movements and groups, schools, unions, dioceses, parishes, and scout groups, involved in a commitment not only against mafias, corruption, crime and those who feed them, but also strongly 'for': for social justice, the search for truth, the protection of rights, transparent politics, a democratic legality based on equality, a living and shared memory, and for a citizenship that lives up to the spirit and hopes of the Constitution.

Established in 1995, it is present throughout Italy in 20 regional coordination groups, 82 provincial coordination groups and 278 local groups. 90 international organizations belong to the Libera Internazionale network, in 42 countries in Europe, Africa and Latin America.

Committed in the fight against organized crime and corruption, Libera is involved in education, awareness raising and actions on responsibility and democratic legality.

Since the beginning, Libera has activated and promoted numerous projects and initiatives in the fight of against organised crime and corruption including: the promotion of Law 109/96 on the social re-use of confiscated assets form mafias and OC; the memory of the innocent victims of the mafia and the support of their families.

In particular, Libera has carried out a first census of positive experiences of social use of confiscated assets: there are over 867 associations and cooperatives assigned assets in Italy, which deal with inclusion and services for people, job reintegration, training and youth aggregation, urban and cultural regeneration, accompaniment to victims and their families.

Libera also focuses on keeping alive the memory and remembrance of the innocent victims of the Mafia. These men, women and children lost their lives at the hands of mafia violence while defending freedom and democracy. For this reason, every year on 21st March, Libera organises the National Day in memory of the innocent victims of the Mafia. Only by turning memory into an instrument of commitment and responsibility can the seeds of new hope be sown.

Partners Albania for Change and Development (PA)

PA was founded in 2001 with initial funding from the United States Agency for International Development (USAID) and Partners for Democratic Change, now known as Partners Global. As a member of the Partners Network, which includes 19 independent organizations across Europe, the Americas, Africa, and the Middle East, PA has been committed to promoting peaceful and democratic change.

IMPLEMENTING ORGANISATIONS, PARTNERS AND COLLABORATORS

The organization's mission is to bolster civil society and inter-sector cooperation, thus enhancing democratic institutions and economic development in Albania. PA has dedicated itself to strengthening civil society and fostering collaboration between non-profit organizations (NPOs), state institutions, academia, and the private sector. This commitment aims to address Albania's primary democratization challenge: enhancing the interaction between citizens and state institutions through a robust civil society. PA's activities span four key areas: *1. Creating an Enabling Environment and Sustainable Development for NPOs; 2. Promoting Entrepreneurship and Social Innovation; 3. Enhancing Philanthropic Activity and Support Infrastructure; and 4. Fostering Transparent and Accountable Participatory Governance.*

Developing an innovative standard model for the social reuse of assets confiscated from organized crime and corruption through social enterprises (SEs) holds significant potential for implementing subsidiary welfare services and revitalizing vulnerable communities. PA has introduced in Albania, in 2016, the model for the social reuse of confiscated assets through the implementation of the "C.A.U.S.E - Confiscated Assets used for Social Experimentations" project. This first initiative in the country and in the Western Balkans region has been followed up by diverse actions.

The Municipality of Tirana

Municipality of Tirana governs Albania's capital, encompassing urban planning, public services, and infrastructure development. It manages various sectors including transportation, waste management, and education. Key projects include major urban redevelopment initiatives, public transport enhancements, and the creation of green spaces. These efforts are part of a broader strategy to modernize the city, improve infrastructure, and enhance residents' quality of life. Involving the Tirana Municipality as partner, which Mayor is the chairman of the Association for Local Autonomy where 60 Albanian municipalities are members, increased the role of local authorities in social reuse of confiscated assets and ensured inclusion of other Municipalities in SEs' projects in confiscated assets and other facilities in their territories, both during the project life and after it.

The Agency for the Administration of the Seized and Confiscated Assets (AASCA)

AASCA is established in 2008 based on Law no. 9284, dated 30.09.2004 "For the prevention and fight against organized crime" changed with Law no. 10 192 dated 03.12.2009 "For the prevention and fight against organized crime and trafficking through preventive measures against assets". It is a state institution under the Ministry responsible for public order and security, responsible for the administration and/or use of seized and confiscated assets from organized crime, such as: bank accounts, vehicles, lands, buildings, machinery, equipment's as well confiscated enterprises. Its headquarters are in Tirana.

SUMMARY OF TWIST OBJECTIVES AND IMPACT

TWIST – Towards a New Social Entrepreneurship Model in Confiscated Assets in Albania aimed to create a sustainable social entrepreneurship model in Albania by utilizing assets confiscated from organized crime and corruption. It focused on strengthening social entrepreneurship for socio-economic development, promoting the social reuse of confiscated assets, and contributing to an inclusive economy.

TWIST engaged Albanian citizens, particularly marginalized groups and those impacted or at risk of being affected by organized crime. Through social entrepreneurship (SE) models, it enabled communities and Civil Society Organizations (CSOs) to benefit from resources recovered from organized crime. The initiative contributed to the creation of job opportunities, positively impacting vulnerable groups such as victims of organized crime and domestic violence, minors, the elderly, people with disabilities, and the unemployed.

TWIST also played a key role in strengthening cross-sector collaboration and support. Non-Profit Organizations (NPOs), as well as local and central government institutions in Albania, enhanced their synergy and cooperation in supporting existing SEs and establishing new ones on confiscated assets. This effort facilitated the implementation of new entrepreneurship models with significant positive impact on local communities across the country.

MAIN PILLARS OF INTERVENTION

1 **Capacity building** for 180 representatives of CSOs, Albanian local authorities, and the AAPSK on the management of a confiscated asset through social entrepreneurship as a practice of social reuse.

STUDY VISIT

The Study Visit to Italy, held in November 2023, included 10 representatives from the winning SEs, along with a delegation from the partnership (Partners Albania for Change and Development and the Municipality of Tirana).

This experience achieved key outcomes for the project's success, including enhancing knowledge of the social reuse of confiscated assets based on Italian examples. It facilitated peer exchanges between Albanian CSOs and Italian social enterprises, providing valuable insight into Italy's legislative model, which can help improve Albanian legislation.

Sharing these positive experiences fosters trust in building a fairer, more transparent society.
